Germany to close all 84 of its coal-fired power plants, will rely primarily on renewable energy

Germany, one of the world's biggest consumers of coal, will shut down all 84 of its coal-fired power plants over the next 19 years to meet its international commitments in the fight against climate change, a government commission said Saturday.

The announcement marked a significant shift for Europe's largest country — a nation that had long been a leader on cutting CO₂ emissions before turning into a laggard in recent years and badly missing its reduction targets. Coal plants account for 40% of Germany's electricity, itself a reduction from recent years when coal dominated power production.

"This is an historic accomplishment," said Ronald Pofalla, chairman of the 28-member government commission, at a news conference in Berlin following a marathon 21-hour negotiating session that concluded at 6 a.m. Saturday. The breakthrough ended seven months of wrangling. "It was anything but a sure thing. But we did it," Pofalla said. "There won't be any more coal-burning plants in Germany by 2038."

The plan includes some \$45 billion in spending to mitigate the pain in coal regions. The commission's recommendations are expected to be adopted by Chancellor Angela Merkel's government.

"It's a big moment for climate policy in Germany that could make the country a leader once again in fighting climate change," said Claudia Kemfert, professor for energy economics at the DIW Berlin, the German Institute for Economic Research.

2 Getting Started

Install Package

test ● test ● test ● test

Instructions

Package

1. **Download** from the repository at <https://github.com/MQ-FOAR705/Osmond-Chiu—Proof-of-Concept—Implementation.git>
2. **Run** the downloaded package to begin installation
3. **Read** these instructions
4. **Tick** off completed tasks from checklist

3 Zotero

3.1 Setup

Complete Installation

test ● test ● test ● test

Instructions

Zotero

1. **Check** that Zotero installation file has been mounted if installation does not automatically pop-up
2. **Drag** the Zotero icon to 'Drag here to install'

Create account

test ● test ● test ● test

Instructions

Zotero

1. **Open** browser
2. **Go to** <https://www.zotero.org/user/login>.
3. **Click** Register for a Free Account.
4. **Choose** the username and email address you want to use for the account.
5. **Click** Register and you'll receive a confirmation email shortly.
6. **Click** on the link in the confirmation email you receive to confirm your account set up.

Sync account

test ● test ● test ● test

Instructions

Zotero

1. **Open** Zotero.
2. **Open** Preferences (via the Zotero menu) and select the Sync tab.
3. **Enter** your Zotero user name and password.
4. **Click** set up syncing.
5. **Check** both boxes under File Syncing and choose Zotero storage for My Library.
6. **Close** Preferences
7. **Click** the green circular arrow button at the top right corner of the Zotero program window to sync account with software.

3.2 Using Zotero With Other Programs

Link Zotero to Overleaf

test ● test ● test ● test

Instructions

Zotero

Overleaf

1. **Log** into Overleaf.
2. **Open** Preferences (via the Zotero menu) and select the Sync tab.
3. **Enter** your Zotero user name and password.
4. **Go** to Account Settings.
5. **Scroll** down the page to Zotero Integration.
6. **Click** on 'Link to Zotero' and you will be prompted to log into Zotero.org
7. **Enter** Zotero username and password.
8. **Create** a New Private Key.
9. **Click** on Accept Defaults and you will be automatically returned to your Overleaf account settings page.
10. **Scroll** down to the bottom of the page to check Zotero Integration.

Import references

test ● test ● test ● test

Instructions

Zotero

Overleaf

1. **Go** to Overleaf
2. **Select** the project that you want to link to Zotero
3. **Select** New File from the top menu.
4. **Select** 'From Zotero', name the file for the project and choose a format (BibLaTeX).
5. **Go** to main.tex file and add your Zotero file (as a bib resource) to header with the code

```
\usepackage{biblatex} before \begin{document}
```

Insert references

test ● test ● test ● test

Instructions

Zotero

Overleaf

1. **Select** where you want to place the reference in the text
2. **Write** /cite then enter in citation

Generate bibliography

test ● test ● test ● test

Instructions

Zotero

Overleaf

1. **Select** where you want to place the bibliography in the text
2. **Insert** your bibliography by typing into the source code

```
/printbibliography
```

4 Hypothes.is

4.1 Setup

Create account

test ● test ● test ● test

Instructions

Hypothes.is

1. **Open** browser
2. **Go to** hypothes.is/signup.
3. **Choose** a username, enter your email address, and create a password.
4. **Click** Sign Up and you will receive a confirmation email to activate your account.
5. **Click** the link in the email received to validate your email and activate your Hypothes.is account

Add Chrome Extension

test ● test ● test ● test

Instructions

Hypothes.is

1. **Go to** web.hypothes.is/start.
2. **Click** click add-on for Chrome.
3. **Accept** the prompt in the pop up window to install the extension.
4. **Consider** adding a bookmarklet if you do not have/use Chrome.

Add Bookmarklet

test ● test ● test ● test

Instructions

Hypothes.is

1. **Go to** web.hypothes.is/start.
2. **Drag** 'Hypothesis Bookmarklet' to the bookmarks bar, or right-click/control-click to bookmark the link.

4.2 Using Hypothes.is

Create tag hierarchy

test ● test ● test ● test

Instructions

Hypothes.is

1. **Identify** what you want tagged based on topics, themes, keywords, source types.
2. **Create** a text document to list tags.
3. **Write** down list of tags based on identified.

Highlight

test ● test ● test ● test

Instructions

Hypothes.is

1. **Go to** webpage or open a local file in a browser.
2. **Click** on Hypothes.is icon in browser toolbar or bookmarklet.
3. **Click** toggle or resize sidebar.
4. **Log** into your Hypothes.is account.
5. **Choose** whether you want the highlight to be public or in a private group .
6. **Select** text that you wish to highlight.
7. **Click** on the Highlight icon that appears.

Annotate

test ● test ● test ● test

Instructions

Hypothes.is

1. **Go to** webpage.
2. **Click** on Hypothes.is icon in browser toolbar or bookmarklet.
3. **Click** toggle or resize sidebar.
4. **Log** into your Hypothes.is account.
5. **Choose** whether you want the highlight to be public or in a private group .
6. **Select** text that you wish to annotate.
7. **Click** on the Annotate icon that appears.
8. **Type** annotations in text box
9. **Type** tags for the annotation
10. **Choose** where to post the annotations (public or private group) and click

Generate API token

test ● test ● test ● test

Instructions

Hypothes.is

1. **Go to** Hypothes.is website.
2. **Log** into your Hypothes.is account.
3. **Click** on gear icon.
4. **Click** on 'Developer'.
5. **Click** Generate Your API token.
6. **Copy** token in text box for use.

5 OpenSemantic Search

5.1 Setup

Install Virtual Box

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Double-click** on the VirtualBox.pkg installer file displayed in that window.
2. **Select** where to install Oracle VM VirtualBox.

Install OpenSemantic Search

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Download** the virtual machine image Open Semantic Desktop Search.
2. **Find** Oracle VM VirtualBox icon in the "Applications" folder in the Finder.
3. **Start** Virtual Box.
4. **Go** into the menu "File" start the option "Import Appliance".
5. **Choose** the downloaded appliance file and start the import Configuration of document folders
6. **Edit** the settings of the new virtual machine (choose the virtual machine in the left sidebar and click the Settings button in the top bar).
7. **Add** shared folders with documents.
8. **Active** the option Auto-mount.

Load OpenSemantic Search

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Start** Virtual Box if not open yet
2. **Select** Open Semantic Desktop Search
3. **Click** on Start Icon

Text search

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Enter** text into the OpenSemantic Search interface
2. **Click** search
3. **Select** relevant filter in facets on the right navigation sidebar

Create tags

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Click** on Thesaurus in the topbar of the OpenSemantic Search interface.
2. **Select** Tag as Facet
3. **Open** file with list of tags (if using existing tag)
4. **Type** name of tag
5. **Type** name of tag into file with list of tags if not existing and save
6. **Save** tag

Tag documents

test ● test ● test ● test

Instructions

OpenSemantic Search

1. **Search** for document you wish to tag
2. **Click** Tagging and annotation for this document in the search results
3. **Add** the pre-existing tags to the document

Import from Hypothes.is

test ● test ● test ● test

Instructions

OpenSemantic Search

Hypothes.is

1. **Repeat** previous instructions to find API token in Hypothes.is account
2. **Don't** regenerate a new token
3. **Copy** API Token
4. **Open** loaded OpenSemantic Search
5. **Click** on Datasources in the topbar of the OpenSemantic Search interface
6. **Click** on Annotations (Hypothesis)
7. **Enter** copied API Token for Authorization
